

The 337F Series Sanitary Ball Valve

The 337F series ball valve incorporates several innovative design features for improved process performance. The valve's uniform bore diameter improves flow characteristics and eliminates pooling of potential contaminants. Roll burnishing and polishing all 316L stainless steel internal surfaces reduces surface porosity and improves finish. The ISO 5211 mounting pad allows for direct mounting of most actuators.

Standard Features and Benefits

- **Tube Full Port Design**
True tube full port construction eliminates pooling of process media and improves flow characteristics for greater efficiency
- **Made of Corrosion-Resistant 316L SS (A351 Gr. CF3M)**
One valve can be used for many service conditions
- **ISO 5211 Direct Mount Pad**
No bracket or drive coupling needed for automation
Improves actuator positioning and prevents side loading
Eliminates exposed moving parts for safer work environment
- **High-Cycle, Live-Loaded Stem Packing**
Ensures tight seal
Extends service life
- **O-Ring Stem Bearing**
Maintains stem alignment
Reduces packing side loading and wear
Enhances stem seal
- **Blow-Out-Proof Stem**
Stem is bottom loaded to prevent removal when valve is in service
- **3-Piece Swing-in-Place Construction**
Easy to repair in service line
- **Locking Device**
Enables plant personnel to secure valve in open or closed position when manually operated
- **Investment Cast**
Improves dimensional control and reduces porosity
- **Internal Surfaces Roll Burnished Prior To Final Polish**
Reduces surface porosity
Improves surface finish
- **BPE compliant extended tube ends**
- **20 Ra Internal Surface Finish**

Options

- Clamp, tube butt weld, extended tube butt weld ends
- Polish and Electro-polish to customer's specification
- Cavity Filled
- CIP connections
- 3A Approved

337F Pressure / Temperature Chart
(TFM Seats)

Operating Conditions

- Temperature Range (TFM Seats): -20°F - 450°F
- Maximum Pressure (TFM Seats): 1000 PSI (1/2" - 1"), 800 PSI (1 1/2" - 2"), 600 PSI (2 1/2" - 4")

Specifications

- Valves inspected and tested to API 598 and meet ANSI/FCI70-2 Class VI and MSS SP-61 seat leakage requirements
- All materials comply with applicable ASTM material specifications, and FDA, USDA and ASME BPE material requirements
- All soft wetted parts comply with FDA CFR Title 21 Part 177
- Material test reports available upon request
- Certified to 3A 68-00 with cavity filled seats and clamp ends
